PROJECT SCOPE STATEMENT	
Project Name	TradeMySkills
Project Deliverables	**Detailed Description**
Stakeholder Register	A document identifying all stakeholders involved in the TradeMySkills project, including team members, the instructor, and potential users, along with their power, interest, and support levels.
Stakeholder Engagement Plan	A document explaining how the team will communicate and engage with stakeholders throughout the project lifecycle.
Project Roles and Responsibilities	A document defining the role of each team member and clarifying their duties within the project.
RACI Chart	A chart showing who is Responsible, Accountable, Consulted, and Informed for major project activities.
Project Scope Statement	A document describing the project deliverables, boundaries, and exclusions.
Project Requirements Document	A document listing the functional and non-functional requirements of the TradeMySkills system.
GitHub Repository and Kanban Board	A shared repository for code and documents, plus a Kanban board to track tasks, deliverables, and progress.
Minimum Viable Product (MVP)	At least one useful and usable functional MVP demonstrating the project's core value.
System Design and UML Diagrams	Process, data, and class diagrams showing the envisioned system design using an MVC and domain-driven design approach.
User Interface Prototypes	Low-fidelity sketches and/or high-fidelity interface designs that illustrate important user experiences.
User Questionnaire	A questionnaire used to gather feedback on the usability and flow of the prototype.

Project Scrum Presentation	A short report-out presentation explaining project planning, design choices, and peer feedback gathered in class.
Project Exclusions	
Mobile application development, payment systems or financial transactions, third-party API integrations, large-scale deployment infrastructure.
